

**TE, SEM V,
COMPUTER
(CHOICEBASE)
MAY 2019**

N.B.: (1) Question No.1 is compulsory.

(2) Attempt any three questions from the remaining five questions.

(3) Make suitable assumptions wherever necessary but justify your assumptions.

1. (a) Solve the following Recurrences using Recursion-Tree Method.
 - i. $T(n) = 2T(n/2) + n^2$ 05
 - ii. $T(n) = T(n/3) + T(2n/3) + n$ 05
- (b) Explain the Line Segment Properties. 05
- (c) Suppose that a node x is inserted into a red-black tree with RB-Insert and then immediately deleted with RB-Delete. Is the resulting red-black tree the same as the initial red-black tree? Justify your answer. 05
- (d) Discuss P, NP, NP-complete and NP-Hard problems. 05
2. (a) Evaluate the maximum flow for the following graph. 10

- (b) What do you mean by Amortized analysis? Explain the Aggregate Analysis method in detail. 10
3. (a) Illustrate the operations that can be carried out on binomial heap with example. 10
- (b) What is the hiring problem? Discuss the randomized algorithm for the same. 10
4. (a) What is Red-Black tree? Show Red-Black tree that results from successive insertion of keys 5, 10,15,25,20, 30 and successive deletion of keys 30, 25,20,15,10 and 5. 10
- (b) Explain the Graham's scan algorithm for finding the convex hull.
5. (a) What is Randomized algorithm? Differentiate Las Vegas and Monte Carlo algorithm. 10
- (b) Explain closest pair of points using divide and conquer. 10
6. (a) Explain with example Maximum Bipartite matching. 10
- (b) Prove Travelling Salesman Problem as NP complete. 10

(3 Hours)

[80 Marks]

N.B. 1) Question No. 1 is compulsory.

2) Attempt any **three** questions out of remaining.

3) Assume suitable data wherever necessary and state them clearly.

- Q.1 a) Give the advantages of memory segmentation of 8086 microprocessor. 05
 b) Differentiate Procedure and macro with example. 05
 c) Explain VM, RF, IOPL and NT flags of 80386 microprocessor. 05
 d) Explain an instruction issue algorithm of Pentium processor. 05
- Q. 2 a) Explain minimum mode configuration of 8086 microprocessor 10
 b) Explain cache organization of Pentium processor. 10
- Q. 3 a) i) Write a short note on mixed language programming. 05
 ii) Write a program to find the largest number from an array. 05
 b) Draw and explain the block diagram of 8255 Programmable Peripheral Interface (PPI) with control word formats. 10
- Q.4 a) Differentiate Real Mode, Protected Mode and virtual 8086 mode of 80386 microprocessor. 10
 b) Design 8086 based system for following specifications: 10
 i) 8086 in minimum mode with clock frequency 5MHz.
 ii) 128 KB EPROM using 32KB*8 chips
 iii) 32 KB RAM using 16KB*8 chips
- Q.5 a) Explain different addressing modes of 8086 microprocessor. 10
 b) Explain the operation of three 8259 PIC in cascaded mode. 10
- Q.6 a) Draw and explain memory read and memory write machine cycle timing diagrams in maximum mode of 8086. 10
 b) Explain the following:
 i) Types of interrupts 05
 ii) Modes of 8253 Programmable Interval timer 05

Time: 3 Hours

Total Marks: 80

N.B.: (1) Question No.1 is compulsory.

(2) Attempt any three questions from the remaining five questions.

(3) Make suitable assumptions wherever necessary but justify your assumptions.

1. (a) Differentiate DFA and NFA. 05
 (b) Design a DFA to accept string of 0's and 1's ending with the string 100. 05
 (c) Explain the applications of Regular Expressions. 05
 (d) What are Recursive and Recursively Enumerable Languages? 05
2. (a) Design NFA for recognizing the strings that end in "aa" over $\Sigma = \{a,b\}$ & convert above NFA to DFA. 10
 (b) Design moore m/c for following:- 10
 If input ends in '101' then output should be A, if input ends in '110' output should be B, otherwise output should be C and convert it into mealy m/c.
3. (a) Obtain a regular expression for the FA shown below: 10

- (b) Explain the types of Turing machine in detail. 10
4. (a) Design a turing machine that computes a function $f(m,n)=m+n$ i.e. addition of two integers. 10
 (b) State and explain pumping Lemma for Context Free Languages. Find out whether the language $L = \{x^n y^n z^n \mid n \geq 1\}$ is context free or not. 10
5. (a) Design PDA for the following language: 10
 $L(M) = \{cw^R \mid w \in \{a,b\}^*\}$ where w^R is reverse of w & c is a constant.
 (b) Convert the following Grammars to the Chomsky normal form (CNF). 10
 $S \rightarrow 0A0 \mid 1B1 \mid BB$
 $A \rightarrow C$
 $B \rightarrow S \mid A$
 $C \rightarrow S \mid \epsilon$
6. Write detailed note on (any two):- 20
 (a) Post Correspondence Problem
 (b) Halting Problem.
 (c) Rice's Theorem.

[Time: 3 Hours]

[Marks:80]

Please check whether you have got the right question paper.

N.B: 1. Question No.1 is **Compulsory**.

2. Attempt any 3 questions out of rest.
3. Make suitable assumptions if any.
4. All questions carry equal marks.

- Q.1**
- a) Differentiate between file system and database system with an example **05**
 - b) Explain Referential Integrity with suitable example **05**
 - c) List the steps required to map ER , EER model to relational model **05**
 - d) Explain the ACID properties of transactions **05**
- Q.2**
- a) Explain the following Relational Algebra operations with suitable example. **10**
 - a) Project b) Select
 - c) Union d) Cartesian Product
 - b) Construct an EER diagram and convert into Relational Model for a library Management System. **10**
Specify 2 complex SQL queries on the above-one using Group by clause and the other using Join operation with an example
- Q.3**
- a) Explain the following terms with an example:- **10**
 - i) Natural join. ii) Set Intersection. iii) Weak Entity. iv) Foreign key
 - b) Explain the Overall Architecture of DBMS in detail. . **10**
- Q.4**
- a) Define Deadlock. Explain how deadlock can be handled **10**
 - b) Explain Specialization and Generalization with suitable example **10**

- Q.5** a) For the schema mentioned below **10**
- Employee(eid, ename, address, city) Works(eid, cid, salary)
 Company(cid, cname, city)
- Create an ER diagram for the same and Specify the SQL queries for each of the statements given below
- 1) Modify database so that John now lives in Mumbai, assuming the database entry has John staying in Delhi.
 - 2) Find Employees who live in same city as the company for which they work.
 - 3) Give all employees of "AZ Corporation" whose salary has increased by 15% in the year 2018-19.
- b) Define the term Normalization as used in database design. Explain the various normal forms with an example **10**

- Q.6** Write short notes on **any two** **20**
- a) Log based recovery mechanism
 - b) Triggers and transaction control commands
 - c) Conflict and View Serializability
 - d) Data Independence
